📂 PROJECTS

Vegist E commerce website ⧉
12/2024
- **Designed and developed** a partially functional e-commerce website using **React.js**, demonstrating proficiency in front-end web development.
- Deployed the website on a **hosting platform** (e.g., Vercel, Netlify) to make it accessible online.
- https://website-1fij.vercel.app/home ⧉

Online Movie Ticket Booking System
2023
The Project Titled as "Online Movie Ticket Booking System", A web application that allows users to browse movies, check showtimes, and book tickets online. Admins can manage movie listings, showtimes, and bookings.
Tech Stack
- **Frontend**: HTML, CSS, Bootstrap (for responsive design), JavaScript (optional for dynamic features)
- **Backend**: PHP
- **Database**: MySQL

- Developed a full-stack web application using PHP and MySQL, enabling users to browse movies, select showtimes, and book tickets online.

- Implemented user authentication and registration features, ensuring secure access and password encryption.
- Designed a responsive user interface using HTML, CSS, and Bootstrap, enhancing user experience across devices.

💼 PROFESSIONAL EXPERIENCE

Python Development Intern

10/2024 – 11/2024

- **Developed Python-based scripts** to automate data processing tasks, reducing manual effort by 20%.
- Assisted in debugging and improving existing Python code, ensuring efficient and optimized functionality.
- Collaborated with team members on a small-scale project to design and deploy a basic application.
- Enhanced understanding of Python development workflows and best practices in a professional setting.
